Professional profile

I bring 13+ years of experience building Drupal and WordPress platforms. I lead architecture, migrations and full-stack delivery, with a focus on performance, accessibility and maintainable systems. My work combines CMS engineering, decoupled interfaces, cloud infrastructure and delivery automation. I communicate technical decisions with stakeholders and mentor developers through implementation and release.

Technical skills

CMS	Drupal 7-11, WordPress, PHP, Symfony, custom modules and themes, Composer, Drush.
Interfaces & APIs	React, Next.js, Angular, JavaScript, TypeScript, HTML, CSS, GraphQL, REST APIs, Drupal JSON:API.
Cloud & performance	AWS (EC2, S3, RDS, Lambda, CloudFront, SQS), Pantheon, Acquia, WP Engine, Redis, Varnish, New Relic.
Delivery & quality	GitHub, GitLab, Bitbucket, CI/CD, PHPCS, PHPStan, SonarQube, Docker, Lando, accessibility and security audits.
Automation	Python, Node.js, browser extensions, Playwright, requirements analysis, environment provisioning and release verification.
Leadership	Technical planning, architecture decisions, stakeholder communication, code reviews, mentorship and Agile delivery.

Professional experience

Rootstack

Senior Drupal / WordPress Full Stack Lead Developer

June 2023 - Present

I lead CMS architecture and delivery across client engagements, combining technical planning with hands-on implementation and release verification.

- Design and build Drupal and WordPress platforms, custom modules, themes and integrations; plan migrations and maintainable content models.
- Develop decoupled React and Next.js interfaces backed by GraphQL and REST APIs, supporting content delivery and editorial workflows.
- Profile performance and implement caching with Redis, Varnish and CDNs; use New Relic to investigate bottlenecks.
- Implement OAuth and SSO integrations, security remediation, semantic interfaces and accessible keyboard navigation.
- Build CI/CD pipelines with PHPCS, PHPStan and SonarQube, and support releases on AWS and managed CMS hosting.
- Develop workflow automation for requirements analysis, local environments, technical documentation and browser verification.

Victor Jimenez

Earlier experience

Senior Drupal Full Stack Lead Developer

January 2020 - June 2023

Led legacy-to-microservices migrations and React/Drupal JSON:API delivery. Built Redis, Varnish and CloudFront caching, automated AWS infrastructure, and mentored developers.

Senior Drupal Full Stack Lead Consultant

July 2021 - April 2023

Delivered enterprise Drupal migrations, standardized Composer and Drush workflows, and improved GitLab CI/Jenkins deployments and AWS integrations.

Drupal Back-End Developer

January 2018 - July 2021

Developed CyberSource payment integrations and APIs for analytics and personalization. Supported headless Drupal with Angular/React and Acquia/Pantheon hosting.

Drupal Full Stack Lead Developer

January 2015 - January 2018

Built custom Drupal modules, themes and CRM integrations. Conducted performance and security audits for high-traffic platforms.

Web Developer

January 2013 - January 2015

Built and maintained database-driven applications using Java, C#, ASP.NET and Oracle.

Selected personal projects

Project Context Connector

Drupal module exposing permission-controlled, read-only site snapshots for automation and CI/CD tools.

Project Context Connector for WordPress

WordPress integration providing read-only site context for external tools and automation workflows.

VictorStack

Personal automation projects and technical writing focused on CMS releases, security and delivery tooling.

Education & languages

B.S., Information Systems Engineering | UNAD, Colombia | 2020-2024

Associate degree in Information Systems | Universidad del Valle | 2009-2012

English C1 Program | EC English School
